EDUCATION

Odesa National Academy named after O.S. Popov, Economist Self-study

React, Redux Toolkit, JavaScript, API, Vite, Firebase Courses:

• ITGit (2023) — JavaScript + React

• Udemy (2024) — Full JavaScript + React course

SKILLS

Frontend Development

• React (Hooks, Context, Router) — building interactive SPA applications

• Redux Toolkit — state management, createSlice, RTK Query (in progress)

• JavaScript (ES6+) — async code, fetch, async/await, closures

Build Tools & Environment

• Vite — fast project setup and optimization

• Git / GitHub — repositories, commits, branches, pull requests

UI/UX & Styling

• Responsive design — adaptive layout for mobile & desktop (flex, grid)

• Bootstrap, Material UI (MUI) — ready-made components for fast UI development

Other

• API (REST, fetch, error handling)

• localStorage — browser data persistence

• ESLint / Prettier — code formatting and linting

In progress

• TypeScript — typing components, props, state

• RTK Query — automatic API requests and caching

PET PROJECTS

Built 4 pet projects using React + Redux Toolkit:

Developed 4 pet projects on React + Redux Toolkit:

Bar website (drink menu, own database)

Cinema website (working with API, search by genre)

Shopping cart (add/remove,calculate the amount)

Travel website (search for flowers, discounts, promotions)

Details, demo and GitHub — on the portfolio website.
